### WUNDERKIND-Custom: Universal number plate insert frame

***D-Breisach a. R. / 14<sup>th</sup> March 2019.*** Those you wish to have a tidy rear at their motorcycle will now find a slim license plate frame from the German accessory manufacturer WUNDERKIND-Custom which convinces with its elegant design and many functional advantages.

*"Often, the simple number plate flutters about at a protruding and unattractive motorcycle rear – fixed only with two or three screws. For those who do not like it we have developed a practical and also elegant alternative: On one hand the license plate can be fixed completely screwless on the high-quality milled aluminum frame. On other hand the frame can be supplemented by LED turn signals and / or only a LED rear light function,"* explains Christian Mehlhorn.

The frame is universal and available for many different motorbike models and license plate sizes. It is offered either with or without LED license plate illumination - depending on whether it can remain on the vehicle or better should be replaced by the integrated on the frame, if visually more consistent. If the original rear light should also be omitted the frame can be supplemented by a brake / tail light unit. Moreover, discreet LED accessory flashers can also be ordered separately which are mounted on the sides of the frame. A further option is to order a self-adhesive reflector.

Various fixing points are already pre-marked for the drills which allow an easy and symmetrical mounting. The license plate is simply inserted into the frame from below. This eliminates annoying screws and associated crackings of the number plate.

The three versions are manufactured in the familiar good quality: The production is made exclusively from high-strength aluminum which is then glass bead blasted and anodized in black. The lighting units are all E-marked.

The delivery includes fixing screws and - in case of a version with light sources - also solder connectors for a fast, electrical connection. Matter of expense: The simplest version starts at EUR 129.00 incl. VAT.
